

SYNCHRONIZATION PREPARATION IN ARIS FOR SAP® SOLUTIONS

CHALLENGE

Before synchronizing from ARIS for SAP Solutions to SAP Solution Manager prerequisites have to be fulfilled:

- Each function and process model in ARIS needs a mapping to the business process hierarchy (scenario, process, process step) by maintaining the corresponding attribute.
- Recurring business processes (functions) have to be represented by shortcut symbols.

FACTS AT A GLANCE:

- ARIS report for automatic maintenance of attribute and automatic replacement of symbols
- Easy & secure fulfillment of essential preparation prerequisites for synchronization

SOLUTION

REDUCE MANUAL
EFFORT TO A MINIMUM

-90%

- Use ARIS report instead of manual maintenance of attributes / symbol
- Report also checks on breaks of modeling conventions, i.e. double assignments to one object
- Use ARIS report to change the symbol of occurrence copies to shortcut
